Robert Santos
Director
U.S. Census Bureau

Subject: Follow-up Request for Reclassification of the Hmong as Southeast Asian in Census Data

Dear Director Santos,

We write to follow up on our previous letters to Census Bureau staff regarding the reclassification of the Hmong community as Southeast Asian rather than East Asian in U.S. Census data. As we highlighted in our previous letters to Census staff on March 2, 2023, and May 11, 2023, accurately reflecting the cultural, historical, and geographic ties of the Hmong community to Southeast Asia is of great importance to our communities.

Since our letters, we have received significant support from community members, advocacy groups, and stakeholders who share our concerns about the misclassification of the Hmong population. Over 1,700 individuals have signed onto our attached petition urging the Bureau to reclassify the Hmong as Southeast Asian and for the Bureau to continue engaging with this population in the formulation of the 2030 Census. The issue continues to gain traction within the Southeast Asian American community, with growing awareness of the implications of accurate demographic representation and its potential impact on not just our data, visibility, and identity but also on potential research and funding.

We understand that reclassification decisions require careful consideration and deliberation, and we appreciate the complexity of the process. However, we remain steadfast in our belief that reclassifying the Hmong as Southeast Asian would align more closely with their identity and cultural heritage, and it would also provide a more accurate portrayal of their experiences in the United States.

Furthermore, reclassification would contribute to addressing longstanding disparities in access to resources and services faced by the Hmong community. Accurate census data is essential for informing policies, allocating resources, and addressing the needs of underserved communities, and we believe that this change would help advance equity and justice for the Hmong population.

We respectfully urge the U.S. Census Bureau to prioritize this matter and initiate the necessary steps to reclassify the Hmong community as Southeast Asian and continue the agency's improved community engagement with the Hmong and broader Southeast Asian refugee community moving into the 2030 Census. Our organizations and partners welcome an opportunity to meet directly with you and are ready to provide any assistance or support needed to facilitate this process and ensure its successful implementation.

Thank you for your attention to this important issue. We look forward to continuing our dialogue and working together to achieve accurate representation for all communities in the United States.

Sincerely,

AAPIData

The President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders Subcommittee on Data Disaggregation

Misclassification of the Hmong Community by Census Bureau

We, the undersigned, come together as a united voice to advocate for a change that is deeply meaningful to our community—the reclassification of the Hmong people as Southeast Asian in the U.S. Census. We ask that you correct this mistake and re-release the 2020 Census data products within one year. We also ask that you increase your engagement with the Hmong community to ensure that our communities are accurately represented in the future. This change is important to us, as it recognizes our unique heritage, our journey, and our contributions to this great nation.

The Hmong community is bound by a shared indigenous history and culture that finds its roots in the lush mountains of Southeast Asia. Our connection to countries like Laos, Vietnam, Thailand, and parts of China is the heartbeat of who we are. Our language, customs, and traditions tell a story of resilience and strength. We have faced many hardships, including forced migration and persecution, but through it all, our distinct identity as Southeast Asian has remained unwavering.

Reclassifying the Hmong as Southeast Asian in the Census is more than a change on paper—it is a recognition of our dignity, our struggles, and our triumphs, including our support for the United States in Laos during the Secret War. It will provide clearer data to shape policies that better serve our community, ensuring we receive the support we need to thrive in this country we now call home.

This change aligns with the Census Bureau's commitment to inclusivity and fairness. By making this adjustment, you show us that our voices matter, that our heritage is valued, and that we are seen. It is a step towards cultural sensitivity and a more inclusive representation of the beautiful mosaic that is America. Our call for this reclassification is not new. It has been echoed in our community for years, a chorus of voices yearning to be heard and recognized. Internationally, our identity as Southeast Asian is acknowledged, and we ask that you extend this recognition to us here in the United States.

We understand the complexities involved in categorizing diverse groups, but this change is a beacon of hope for our community—a promise that our story will be accurately told, that our needs will be understood, and that our contributions will be celebrated. We implore you to reconsider the classification of the Hmong community as Southeast Asian in the current Census products.

Sincerely,

A D
